

A winning partnership

Nissan South Africa has decided to withdraw from the national off-road championships effective 31 December 2009. This decision has brought to an end the most illustrious era in South Africa's motor sport history.

Donaldson Filtration Systems enjoyed a highly successful first year as the naming rights partner of the Donaldson Nissan Off-road team and is proud to have been associated with Nissan Motor sport for seven years.

This association also enabled us to garner prosperous brand awareness, not only in the motor sport arena, but throughout the industries for which we provide superior filtration solutions.

We would like to encourage all Donaldson Nissan motor sport fans to join us in Magaliesberg, for the RFS 400 on 7 November, to bid Nissan motor sport farewell and wish them all the best for the future.

As for Donaldson Filtration Systems future involvement in motor sport, no decisions have been made and we will use the next few months to evaluate our options and related brand opportunities.
