

Cracking down on dust and dirt

Hheavy-duty truck and off-road equipment manufacturers and users demand compact, high performance air filtration solutions.

Donaldson's new air cleaner expands the PSD family of air cleaners that includes side-access and end-access models in a range of sizes. The PowerCore PSD Air Cleaner Side Access offers the trusted features and benefits of two-stage filtration in a single, compact unit that delivers superior filtration performance using Donaldson PowerCore Filtration Technology.

Features of the PSD Air Cleaner Family include:

- More compact at a given performance level than standard pleated filters; non-metal filters – both primary and safety (where applicable)
- Improved engine protection – no media movement, expansion, contraction or bunching
- Improved contaminant encapsulation – dust and dirt stay contained in filter during service
- Improved filtration efficiency – three times more efficient than average conventional pleated filters
- Improved handling and maintenance – lighter and smaller so changing filters is quicker and easier
